

Disease Surveillance

We use traps to identify, test, and check for diseases that are:

- Mosquito-borne
- Rodent-borne
- Tick-borne

We place traps in our service areas that attract and trap mosquitoes. Once they are trapped, we send them for testing. If you see a trap in your neighborhood, don't worry! We will pick up the traps in the next few days.

Report Dead Birds

Reporting dead birds allows us to test them for West Nile virus. If you notice a dead bird, call the California West Nile Virus Hotline at (877) 968-2473 or scan the QR code.

Report Green Pools

Unmaintained pools often turn green and can become the ideal habitat for mosquito breeding. If you notice a green pool around your home give us a call or text!

Courtesy Inspections and Consultations for:

- Mosquitoes
- Rodents
- Bed Bugs
- Fleas
- Ticks
- Flies
- Cockroaches
- Bees/Wasps

Scan the QR code to submit a courtesy mosquito/vector inspection request, or to submit a complaint.

Public Health
Environmental Health Services

Mosquito and Vector Control Program (MVCP)

Our Goal

We control disease vectors and nuisances caused by pests by using effective and environmentally friendly methods.

What is a Vector?

Any insect, rodent, or animal of public health significance that can transmit diseases to humans.

Mosquito Control

We identify, monitor, and treat mosquito breeding sources to reduce the risk of disease transmission.

Mosquitoes can lay eggs in:

- Curbs and gutters
- Decorative ponds
- Underground water systems
- Storm water systems
- Flood control basins/channels
- Green pools and other sources of standing water

Mosquito Fish

We offer FREE mosquito fish to all San Bernardino County residents in our service area to use in ponds for mosquito control on their property.

Community Outreach

You can contact our outreach team at ehsmoe@dph.sbcounty.gov to request:

- Community event tabling
- School and group presentations
- Other media requests

Tips for preventing flies, roaches, rodents, and other pests:

- Store food and food waste properly
- Fix gaps and holes where pests may enter
- Inform landlord promptly of pest issues

Contact MVCP if the landlord does not address a pest issue.
