Please be advised that the San Bernardino County Solid Waste Local Enforcement Agency (LEA) received and approved a Report of Facility Information (RFI) amendment to the RFI for the Metropolitan Water District Iron Mountain Pumping Plant. The LEA is certified by the California Department of Resources Recycling and Recovery (CalRecycle), to enforce state laws and regulations at solid waste sites within the San Bernardino County, including all active and closed landfills.

Description of Project and LEA's Preliminary Determination

The Metropolitan Water District Iron Mountain Pumping Plant is located y 30 miles north of Desert Center and one mile east of the MWD Iron Mountain Pumping Plant in Earp, CA. On May 12, 2023, the LEA received a Solid Waste Facility Permit (SWFP) application package for the Metropolitan Water District Iron Mountain Pumping Plant to amend the RFI to update information in the current RFI based on "Findings" identified during the facility's 5-Year Permit Review. The amendment includes updates to the Post Closure Maintenance Plan (PCMP) including that inspection and maintenance records shall be submitted to the LEA and other regulatory agencies annually, the LEA and other regulatory agencies will be notified in the event of an emergency at the facility and additional minor edits to reflect current site conditions. The updated PCMP also references and includes the 2022 updated post-closure maintenance cost estimates.

The LEA finds that the proposed change is consistent with all applicable certified and/or adopted CEQA documents, is consistent with State Minimum Standards, and does not conflict with the terms and conditions in the current solid waste facilities permit. The LEA accepted the RFI amendment on June 15, 2023.
